NEW SUPER-HYDROPHOBIC WATER
REPELLENT COATING

A PROTECTIVE INVISIBLE SHIELD

Wood needs lasting protection against the action of *water* and *weather*.

The new super-hydrophobic coating developed by the R&D team at Sherwin Williams Italy is the ideal solution for an invisible wood protection.

 **SAYERLACK**[®]
INNOVATIVE WOOD SOLUTIONS

Sayerlack is a brand of
The Sherwin-Williams Company

COLOUR: clear, ready to use

USE: outdoor furniture

SUBSTRATES: softwood and hardwood. Also suitable for application on stone and masonry

APPLICATION SYSTEMS: brush, spray, dipping.

This new **high transparency** coating has a strong **waterproof effect** and **good outdoor resistance**. It is **outstanding at repelling water**, with **good permeability** and **wet on wet adhesion**. Good results on various types of wood. The coating works just like new generation fabrics used for high mountain clothing, allowing moisture out.

The technology is based on a special organic - inorganic hybrid polymer with a self-crosslinking mechanism. All in the most environmentally friendly solvent available: water. The product is suitable either for vertical or angled substrates, making it easy for water to flow away.

PRODUCT DESCRIPTION AND MAIN TECHNICAL FEATURES

Air drying: 2h.

Over-coatability: only with itself.

TECHNICAL PLUS FACTORS	ADVANTAGES
New technology.	Repelling water effect.
Low gloss level.	Natural effect and excellent clearness.
Easy to apply.	Industrial use.
Excellent adhesion.	No need for sanding between coats.
